Versatility

The QuasIR™ 3000 offers a new kind of NIR analysis solution. Its portable design brings NIR directly to the point-of-need and its unmatched spectroscopic performance delivers the fastest, most accurate results.

Innovation

The QuasIR™ 3000 delivers a wide range of technical innovations including our PermAlign™ optics technology. This advanced optical design maintains alignment and performance under conditions from the routine to the extreme.

Our Advanced-ID™ software is a targeted screening software tool that allows quick screening and semi-quantitative results for concentrations substantially less than 0.1%. Advanced-ID™ extends the use of NIR to further reduce ingredients supply chain risk and protect brand integrity.

Large Sampling Design

The QuasIR™ 3000 has an enhanced 23mm sampling area, which is up to 5 times larger than competitive products. The large sampling area, with a scratch-resistant sapphire window, helps produce better, more reproducible results.

Consistency

The QuasIR™ 3000 is designed to ensure direct calibration transfer without the frustration of standardizing instruments or adjusting models to accommodate excessive instrument variability. Our technology and design ensure unmatched consistency and direct method transfer with no loss in performance, so you can expand your QuasIR™ fleet with confidence.
